PETITION FOR LEAVE TO AMEND

Southwest Florida Community Radio, Inc. (Southwest) pursuant to Rule 1.65 and as directed in the Hearing Designation Order, DA 92-224 (released March 10, 1992) (HDO) seeks leave to amend its pending application. The amendment provides information requested in the HDO and updates information in Southwest's application.

No. of Copies rec'd 076  
List A B C D E

Good cause exists to grant this petition. The amendment is filed in response to the HDO, which requested all applicants within 30 days of release of the HDO, to file an environmental statement. In addition, each applicant was directed to submit an amendment explaining how its workers will be protected. See HDO, Paragraphs 7 and 15. The amendment also provides updated information relating to other broadcast interests and the address of one of its principals. Acceptance of the amendment will result in no comparative upgrade, will not disrupt the proceeding, will result in no prejudice to other parties, and will not require addition of issues. See Erwin O'Connor Broadcasting Company, 22 FCC2d 140 (Rev. Bd. 1970).

Respectfully requested,

SOUTHWEST FLORIDA COMMUNITY  
RADIO, INC.

By A. Wray Fitch III  
A. Wray Fitch III  
Its Counsel

[klw/243.petition]

The application of Southwest Florida Community Radio, Inc.  
is hereby amended to incorporate the attached amendment.

4/8/92  
(Date)

  
Robert Augsburg, President  
Southwest Florida Community Radio

### AMENDMENT

The pending application of Southwest Florida Community Radio, Inc. is amended in the following respects:

(1) The attached engineering statement relating to compliance with Rule 1.1311 and worker safety should be associated with the application.

(2) The application of Southwest Florida Community Radio for a new noncommercial FM station in West Palm Beach, Florida (File No. BPED-891127MC) has been granted. A construction permit was issued on September 5, 1992.

(3) Southwest Florida Community Radio has completed construction of a new noncommercial station in Columbia, Tennessee. A license application was filed on March 31, 1992.

(4) Robert Augsburg's new address is: 1018 Highland Road, Brentwood, Tennessee 37027.

ENGINEERING STATEMENT OF KEITH G. BLANTON OF THE FIRM OF  
KESSLER AND GEHMAN ASSOCIATES, INC., CONSULTING ENGINEERS,  
IN CONNECTION WITH AN AMENDMENT TO THE APPLICATION, FILE NO. BPED-891127MC,  
OF SOUTHWEST FLORIDA COMMUNITY RADIO, INC.  
FOR A CONSTRUCTION PERMIT FOR A NEW FM BROADCAST STATION  
WHICH WOULD OPERATE ON CHANNEL 202 WITH AN EFFECTIVE RADIATED POWER OF  
1.9 KILOWATTS HORIZONTALLY POLARIZED  
AT AN EFFECTIVE ANTENNA HEIGHT OF 446 METERS ABOVE AVERAGE TERRAIN  
IN THE VICINITY OF CONWAY, FLORIDA

I, Keith G. Blanton, am an associate of Kessler and Gehman Associates, Inc., with offices in Gainesville, Florida. I have been working in the field of radio and television consulting engineering since 1961. I graduated from Duke University in 1951 with a Bachelor of Science degree in Physics.

This firm had been employed by Southwest Florida Community Radio, Inc. to prepare the engineering portion of the application, File No. BPED-891127MC, for a construction permit for a new FM broadcast station which would operate on channel 202 with an effective radiated power of 1.9 kilowatts horizontally polarized at an effective antenna height of 446 meters above average terrain in the vicinity of Conway, Florida. The application has been designated for hearing along with those of several other applicants. The hearing designation order required that each applicant explain how workers on the tower upon which its antenna will be mounted will be protected from electromagnetic radiation emanating from it. In addition the hearing designation order also required that each applicant address the question of whether the proposed operation would constitute a significant environmental impact and if so submit the required environmental impact statement in accordance with Section 1.1311 of the FCC rules.

In response to these requirements it is stated that Southwest Florida Community Radio, Inc. will reduce or if necessary completely cut-off the power from its transmitter to the WCPX-TV antenna when workers on the tower would be endangered by their proximity to the antenna. As explained in my engineering statement dated September 18, 1990 it has been proposed that the power from the channel 202 FM transmitter would be diplexed into the RCA TBF-6BM antenna presently used by WCPX-TV which is mounted at 438 meters above ground on the 490 meter tower. As a consequence of this fact the maximum possible power density on the ground at the base of the tower would be increased from 0.3803 to 0.3806 mW/cm<sup>2</sup> as a result of the proposed operation of the channel 202 FM station and there would otherwise be no other environmental impact.

KESSLER AND GEHMAN ASSOCIATES, INC.
